## Polygons

Classify each polygon. Then tell if it appears to be a regular or irregular polygon.
1.

2.

$\qquad$
$\qquad$
$\qquad$
3. Classify the polygon. Name the vertices.

$\qquad$
4. Which polygon has eight sides?
A quadrilateral
B pentagon
C hexagon
D octagon
5. Writing to Explain Draw two regular polygons and two that are irregular. Use geometric terms to describe one characteristic of each type.
